## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Species I, directed towards figures 11, 12A, 14A, 14B, 19 and 20.
- II. Species II, directed towards figure 15

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

If applicant elects either species I or Species II a further sub-species election is required.

- a. Sub Sub-species b, directed towards figure 16A.
- b. Sub-species c, directed towards figure 16B.
- c. Sub-species d, directed towards figure 16C.

Applicant is required, in reply to this action, to also elect a single sub-species to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 3752

The reply must also identify the claims readable on the elected species and sub-species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

The claims are deemed to correspond to the species in the following manor:

Species I, claims 1-7, 9-13.

Species II, claim 8.

Sub-species a, all.

Sub-species b, all.

Sub-species c, all.

Sub-species d, all.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The claims are deemed to correspond to the species listed above in the following manner:

Art Unit: 3752

The special technical feature of species I is the nozzle edge which is at 90 degrees from the centerline of the nozzle, which is not the case in species II.

The special technical feature of sub-species b is the nozzle inlet including the tapered passage, which is not the case in sub-species a, c or d.

The special technical feature of sub-species c is the nozzle inlet including the tapered passage, which is not the case in sub-species a, b or d.

The special technical feature of sub-species d is the nozzle inlet including the tapered passage, which is not the case in sub-species a, b or c.

A telephone call was made to Daniel Lent on 12/27/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiner would like to note that no detailed description of figures 16a to 16c is included in the disclosure. It is unclear to the examiner at this point whether or not figures 16a to 16c apply to each nozzle tip previously disclosed.
